Output Indicator(s)													
1. Percentage of undergraduate students enrolled in CHED-identified and RDC-identified priority programs				87.10% (20,621/23,675)		87.10% (20,621/23,675)	84.35% (20,103/23,833)	84.35% (20,103/23,833)	83.47% (22,036/26,400)	83.47% (22,036/26,400)	83.47% (22,036/26,400)	-3.63%	The variance in the percentage of undergraduate students enrolled in CHED-identified and RDC-identified priority programs can be attributed to several factors. 1.A number of students who did not meet the prescribed retention standards in priority programs were transferred to other non-priority programs within the university. While the enforcement of these policies upholds academic quality, it consequently reduced the enrollment figures in priority programs. 2.Some degree programs (i.e., Bachelor of Public Administration) that were previously listed as national or regional priority programs have been reclassified as non-priority due to changes in regional or national workforce demands. This realignment affected the computation of the overall percentage of students under priority programs. Action Plans to Attain the Targets 1.Conduct regular consultations with stakeholders and the Industry Advisory Board to ensure that program offerings remain responsive to labor market demands, regional development needs, and emerging industry trends. 2.Conduct intensive career orientation, academic advising, and promotional activities that highlight the relevance, employability, and opportunities offered by national and regional priority programs to attract and retain qualified students. 3.Strengthen academic support and intervention programs to help students meet retention requirements and remain in priority programs. 4.Regularly review and align the list of institutional programs with
